

Library Director's report

Prepared by Director Susan Getty

June 4, 2019

Monthly statistics: statistical summaries for the month of May 2019 will be available at our meeting.

Financial/Donations:

- The Friends of the Library paid for the new mulch in the library's garden beds, as well as some new plants. They are also funding supplies for our Adult Craft Nights and for our upcoming summer programs.

News/Issues:

- The high school's day of community service went very well, and the students who came to work on the library's garden beds did a great job.
- Jack Scott (SALS) has done a large amount of work on our new website, but there is more to be done.
- The process of upgrading our internet access has been set in motion: Chris (SALS) has contacted Spectrum on our behalf, and they will be sending us a contract. When they make an appointment to come to do the upgrade, Chris will be in attendance, as well, to be sure that all is done properly.
- The first mobile DMV day at the library went well. The DMV employees who were here seemed quite pleased with the set-up.

Programs:

- "Teens Takeover the Library", will now be taking place on the first Fridays of each month from 6 - 8, due to our extended hours. It's possible that a few other programs may shift their timing as well.
- We (mostly Karen) have been working on a summer programs schedule. We will be publicizing the full slate of events soon, and will be specifically sharing this information with the Lunch, Learn, and Play program. We will likely will be sending a flyer home through the school district.
